

14) What happened to the fish stocks in Europe?

Fish populations destroyed by farming and over fishing.

15) How is fishing different in the Americas?

Rivers are untouched full of fish. Populations are very healthy - Natives transport fish far away from coastline.

16) Why did the Anasazi, the civilization located in present day New Mexico, disappear?

Drought, loss of trees, resources dried up.

17) How was wood important to the Europeans? (What were they using wood for?)

Europe uses wood for building homes and ships, furniture, tools, heat.

Basically they cut down all these trees.

18) What object was invented that allowed the spread of new ideas and information?

Printing Press - Books and ideas spread to all of Europe quickly.

Video Review

Directions: Using your answers from the video questions, fill in the chart below comparing Europe to America in 1491.

	Europe	America
Civilizations / Countries	Ex: Spain England France Italy	Ex: Inca Mississippians Aztec Anasazi
Domesticated Animals	Goat Sheep Pig horse Cows	Turkey Llama
Fishing	Industry - over fishing and farming destroyed the rivers	Lots of fish - Rivers are unaffected by farming and over fishing
Wood	Use wood for everything Boats, homes, heat, cooking, tools, furniture	Natural Balance don't take more than they need.
Staple Crops	Grains - rye, wheat Orchards - apple, pear,	Corn; Potatoes
Tools / Inventions	Iron tools Guns Printing Press wind/ water power	Hand tools and weapons no mechanical tools or iron
Population	Growing very quick resources can't keep up.	Stable - In balance with nature not growing or decreases.
